

I would recommend expanding **Innomatrics Technologies** from mainly a **website/app development company** into a **full-service digital transformation and technology solutions company**.

Based on your current positioning and the services you already work with, there is a good opportunity to add **AI, SaaS, ERP, cloud, cybersecurity, automation, and managed IT services**. Your public company profile already positions you around custom software, web/mobile apps, cloud solutions, IT consulting, and managed IT services, so these additions would fit naturally.

Recommended Service Structure for Innomatrics

1. Website & Web Development

- Corporate Website Development
 - Business Website Development
 - WordPress Development
 - Custom PHP Development
 - React.js Development
 - Next.js Development
 - Laravel Development
 - Node.js Development
 - E-Commerce Website Development
 - Multi-Vendor E-Commerce
 - Booking & Reservation Websites
 - Portal Development
 - Landing Page Development
 - Website Redesign
 - Website Maintenance
-

2. Mobile App Development

- Android App Development
- iOS App Development
- Flutter App Development
- React Native App Development
- Cross-Platform App Development
- E-Commerce Apps
- Delivery Apps
- Taxi & Ride Booking Apps
- Matrimony Apps
- Education Apps
- Healthcare Apps

- Travel & Tourism Apps
- Business Apps
- On-Demand Service Apps

Add as a separate service:

- App UI/UX Design
 - App Testing & QA
 - Play Store Publishing
 - Apple App Store Publishing
 - App Maintenance & Updates
-

3. Custom Software Development

This can become one of your **highest-value services**.

- Custom Business Software
 - CRM Development
 - ERP Development
 - HRMS Software
 - Payroll Software
 - Inventory Management
 - POS Software
 - Billing & Accounting Software
 - School/College Management
 - Hospital Management
 - Restaurant Management
 - Manufacturing ERP
 - Garment ERP
 - Logistics Management
 - Transport Management
 - Tours & Travels Software
 - Project Management Software
-

4. AI & Automation Services ★

I strongly recommend adding this category.

- AI Chatbot Development
- AI Customer Support
- WhatsApp AI Chatbot
- AI Voice Agents

- AI-Powered Business Automation
- Generative AI Integration
- OpenAI API Integration
- AI Document Processing
- AI Content Generation
- AI Image Generation Integration
- AI Recommendation Systems
- AI-powered CRM
- AI-powered Analytics
- Custom AI Solutions

You can position this as:

AI Solutions & Intelligent Business Automation

5. SaaS Product Development ★

This is a very good service for your company.

- SaaS Application Development
- Multi-Tenant SaaS
- Subscription-Based Software
- SaaS Admin Panels
- SaaS Mobile Apps
- Payment & Subscription Integration
- Tenant Management
- Role-Based Access
- SaaS API Development
- Cloud-Based Business Platforms

You can also build your own products and offer them on monthly subscriptions.

6. E-Commerce Solutions

Create a dedicated service category.

- E-Commerce Website
- Multi-Vendor Marketplace
- B2B E-Commerce
- B2C E-Commerce
- D2C E-Commerce
- Mobile Commerce Apps

- Shopify Development
 - WooCommerce Development
 - Custom E-Commerce
 - Payment Gateway Integration
 - Delivery Integration
 - Inventory Integration
 - Marketplace Admin Panel
-

7. Cloud & DevOps ★

Since you already work with AWS, EC2, S3, CloudPanel, Vercel, Firebase, etc., this is a natural expansion.

- AWS Cloud Services
- Cloud Migration
- AWS EC2 Setup
- AWS S3
- Cloud Database Setup
- Server Deployment
- Domain & DNS Management
- SSL Installation
- Cloudflare Setup
- CI/CD Pipeline
- GitHub/GitLab Deployment
- Docker Deployment
- Server Monitoring
- Backup & Disaster Recovery
- Cloud Cost Optimization

Position this as:

Cloud, DevOps & Infrastructure Solutions

8. Cybersecurity ★

Add this carefully and only offer services your team can genuinely deliver.

- Website Security
- WordPress Security
- Security Audit
- Vulnerability Assessment
- SSL & HTTPS Security

- Firewall Configuration
- Malware Removal
- Backup & Recovery
- Security Monitoring
- Data Protection Consulting

Later, you can expand into professional penetration testing through qualified specialists.

9. Digital Marketing

You already have experience in this area, so make it a complete division.

- SEO
 - Local SEO
 - Technical SEO
 - Google Ads
 - Meta Ads
 - Social Media Marketing
 - Social Media Management
 - Content Marketing
 - Google Business Profile Optimization
 - Lead Generation
 - WhatsApp Marketing
 - Email Marketing
 - Online Reputation Management
 - Conversion Rate Optimization
-

10. UI/UX & Product Design

A separate category can improve your sales positioning.

- UI/UX Design
- Website UI Design
- Mobile App UI Design
- Dashboard Design
- SaaS Product Design
- Design System Development
- Figma Prototyping
- UX Research
- Wireframing
- Branding & Visual Identity

11. API & Third-Party Integration ★

- REST API Development
- API Integration
- Payment Gateway Integration
- Razorpay Integration
- WhatsApp API
- SMS Gateway
- Email API
- Google Maps Integration
- Shipping API
- Bus Booking API
- Hotel Booking API
- CRM Integration
- ERP Integration
- Accounting Software Integration
- Government/Enterprise API Integration

12. Software Testing & QA

This is a good additional revenue stream.

- Manual Testing
- Functional Testing
- Mobile App Testing
- Web Application Testing
- API Testing
- Cross-Browser Testing
- Performance Testing
- Regression Testing
- User Acceptance Testing
- QA Automation

13. IT Consulting & Digital Transformation ★

Create a high-value consulting service.

- Technology Consulting
- Business Process Automation
- Digital Transformation

- Software Architecture Consulting
 - Technology Stack Consulting
 - IT Infrastructure Consulting
 - Product Strategy
 - MVP Consulting
 - Startup Technology Consulting
 - Software Modernization
 - Legacy System Migration
-

14. Dedicated Development Team ★

This can generate recurring monthly revenue.

Offer:

Hire Dedicated Developers

- Hire Flutter Developer
- Hire React Developer
- Hire Node.js Developer
- Hire PHP/Laravel Developer
- Hire UI/UX Designer
- Hire QA Tester
- Hire DevOps Engineer
- Dedicated Project Manager
- Full Development Team

You can offer **monthly developer/team engagement models**.

15. Maintenance & Managed IT Services ★

Very important for recurring revenue.

- Website Maintenance
- App Maintenance
- Software Maintenance
- Server Management
- Cloud Management
- WordPress Maintenance
- Security Monitoring
- Backup Management
- Performance Optimization

- Monthly Technical Support
 - AMC Plans
 - Managed IT Support
-

My Recommended Main Navigation

Don't put 50 services directly in the main menu. Organize them like this:

Home

Services

- Web Development
- Mobile App Development
- Custom Software
- ERP & CRM Solutions
- AI & Automation
- SaaS Development
- E-Commerce Solutions
- UI/UX Design
- Cloud & DevOps
- Cybersecurity
- Digital Marketing
- IT Consulting
- Software Testing
- Maintenance & Support

Solutions

- Business Automation
- ERP Solutions
- CRM Solutions
- Industry Solutions
- SaaS Products
- On-Demand Apps

Industries

- Healthcare
- Education
- E-Commerce
- Travel & Tourism
- Logistics

- Manufacturing
- Garments & Textile
- Real Estate
- Restaurants
- Finance
- Startups

Technologies

- Flutter
- React.js
- Node.js
- Laravel
- PHP
- WordPress
- AWS
- Firebase
- MySQL
- MongoDB
- AI & OpenAI

Portfolio

Case Studies

About Us

Blog

Contact

Most Important: Add "Solutions" Instead of Only "Services"

For your business, I recommend moving toward this model:

Client says:

"I need software for my garment factory."

Your website shows:

Garment Manufacturing ERP Solution

- Production Management
- Inventory
- Purchase
- Sales
- HR & Payroll
- Quality Control
- Accounts
- Management Dashboard
- Mobile Apps

This is much stronger than simply saying **"We develop software."**

Create industry-specific solution pages such as:

- **Garment ERP Software**
- **Tours & Travels Management Software**
- **School Management Software**
- **Hospital Management Software**
- **Restaurant POS Software**
- **Logistics Management Software**
- **Real Estate CRM**
- **Matrimony Platform**
- **E-Commerce Marketplace**
- **Delivery Management Platform**

This approach can help you target high-intent Google searches and generate better-quality leads.

★ **My Top 10 Priorities for Innometrics**

If you don't want to add everything at once, I would prioritize:

1. **AI & Automation**
2. **Custom ERP Development**
3. **CRM Development**
4. **SaaS Product Development**
5. **Cloud & DevOps**
6. **Cybersecurity**
7. **Dedicated Developer Teams**
8. **IT Consulting**
9. **Software Testing & QA**
10. **Managed Maintenance & AMC**

Your strongest positioning could become:

Innomatrics Technologies — Software Development, AI, Cloud & Digital Transformation Partner

Then your website can communicate that you provide **complete technology solutions from idea → design → development → deployment → marketing → maintenance.**

I also recommend creating **separate landing pages for every major service**, rather than listing all services on one page. This will give you more opportunities for SEO and Google Ads campaigns. The broader IT-service model used by other software companies commonly combines development, API integration, QA, cloud, cybersecurity, consulting, and digital marketing, which supports this broader positioning strategy.

If you want, I can next prepare a **complete new Innomatrics Technologies website sitemap + homepage structure + 50+ service pages + SEO keywords + page-wise content**, specifically designed to help you generate **more software development and digital marketing leads.**

Prepare a complete new Innomatrics Technologies website sitemap, homepage structure, 50+ service pages, SEO keywords, and page-wise content

Absolutely. Based on your current business direction and the services you already deliver, I recommend rebuilding **Innomatrics Technologies** as a broader **Software Development + AI + Business Automation + Digital Growth** company rather than presenting it only as a website/app development company.

I reviewed your current website, but the public page is currently rendered as a JavaScript application, so the detailed existing page content was not available to inspect directly. I also reviewed current positioning among Bangalore technology companies. A strong pattern is to combine custom software, SaaS, ERP/CRM, AI automation, cloud, digital marketing, and industry-specific solutions under one technology partner.

Below is the **complete website blueprint I recommend.**

INNOMATRICS TECHNOLOGIES

Complete Website Sitemap + 50+ Service Pages + SEO Strategy + Page Content

Recommended Brand Positioning

Primary tagline:

We Build Digital Solutions That Move Your Business Forward.

Alternative:

Software. AI. Automation. Digital Growth. One Technology Partner.

Recommended positioning statement

Innomatrics Technologies is a software development and digital transformation company helping startups, SMEs, and enterprises build powerful websites, mobile applications, custom software, ERP systems, AI-powered solutions, cloud infrastructure, and digital growth strategies.

This gives you a much broader market than simply:

"We are a website and mobile app development company."

1. COMPLETE WEBSITE SITEMAP

- AMC Services

2. INDUSTRY SOLUTIONS

This is one of the **most important additions** I recommend.

Instead of only selling technology, sell **ready-to-understand business solutions**.

Industries

- Healthcare Solutions
- Education Solutions
- E-Commerce Solutions
- Manufacturing Solutions
- Garment & Textile ERP
- Travel & Tourism Solutions
- Logistics Solutions
- Real Estate Solutions
- Restaurant & Food Business Solutions
- Retail Solutions
- Finance & Accounting Solutions
- Professional Services
- Startup Solutions

Each industry page should explain:

Industry Problem → Your Solution → Features → Technology → Benefits → CTA

3. 60+ SERVICE PAGES

Below is the recommended service-page architecture.

CATEGORY A — WEBSITE DEVELOPMENT

1. Website Development Company in Bangalore

URL:

/website-development-company-bangalore

Primary Keyword:

Website Development Company in Bangalore

Secondary Keywords:

- Website Development Company
- Web Development Company Bangalore
- Website Design Company Bangalore
- Professional Website Development
- Custom Website Development

Page Content:

Innomatrics Technologies provides professional website development services for startups, small businesses, SMEs, and enterprises. We design and develop fast, responsive, secure, SEO-friendly websites that help businesses establish a strong online presence and generate more enquiries.

CTA:

Get Your Website Development Quote

2. Custom Website Development

/custom-website-development

Keywords:

- Custom Website Development
 - Custom Web Development Company
 - Business Website Development
-

3. Web Application Development

/web-application-development

Keywords:

- Web Application Development
 - Custom Web Application Development
 - Business Web Applications
-

4. React.js Development

/react-js-development

Keywords:

- React.js Development Company
 - React Development Services
 - React Developers India
-

5. Next.js Development

/next-js-development

Keywords:

- Next.js Development Company
 - Next.js Developers India
 - Next.js Web Development
-

6. Node.js Development

/node-js-development

Keywords:

- Node.js Development Company
 - Node.js Developers
 - Node.js Backend Development
-

7. PHP Development

/php-development

8. Laravel Development

/laravel-development

9. WordPress Development

/wordpress-development

Keywords:

- WordPress Development Company
- WordPress Website Development
- WordPress Developers Bangalore

10. E-Commerce Website Development

/ecommerce-website-development

Keywords:

- E-Commerce Website Development
- E-Commerce Development Company
- Online Store Development

11. Multi-Vendor Marketplace Development

/multi-vendor-marketplace-development

Keywords:

- Multi Vendor Marketplace Development
- Marketplace App Development
- Multi Vendor E-Commerce

12. Progressive Web App Development

/progressive-web-app-development

CATEGORY B — MOBILE APP DEVELOPMENT

13. Mobile App Development Company

/mobile-app-development-company-bangalore

Primary Keyword:

Mobile App Development Company in Bangalore

Content:

Innomatrics Technologies develops scalable Android and iOS mobile applications for startups, businesses, and enterprises. From UI/UX design and development to API integration, testing, deployment, and maintenance, we provide complete mobile app development solutions.

14. Android App Development

/android-app-development

15. iOS App Development

/ios-app-development

16. Flutter App Development

/flutter-app-development

17. React Native App Development

/react-native-app-development

18. Cross-Platform App Development

/cross-platform-app-development

19. Mobile App UI/UX Design

/mobile-app-ui-ux-design

20. Mobile App Maintenance

/mobile-app-maintenance

CATEGORY C — CUSTOM SOFTWARE

21. Custom Software Development Company

/custom-software-development

Primary Keywords:

- Custom Software Development Company
- Custom Software Development Bangalore

- Business Software Development

Content:

Every business has unique workflows. Innomatics Technologies develops customized software solutions designed around your business processes, operations, employees, customers, and growth objectives.

22. Enterprise Software Development

/enterprise-software-development

23. SaaS Product Development

/saas-product-development

24. CRM Development

/crm-development

25. ERP Development

/erp-development

26. Business Automation Software

/business-automation-software

27. Workflow Automation

/workflow-automation

28. API Development

/api-development

29. API Integration Services

/api-integration-services

CATEGORY D — AI & AUTOMATION

This should be a **major new service division**.

Current Bangalore technology competitors increasingly position AI automation and AI agents alongside software development, rather than treating AI as a standalone experimental offering.

30. AI Development Company

/ai-development-company

Content:

Innomatrics Technologies helps businesses adopt artificial intelligence through practical, scalable, and business-focused AI solutions. We integrate AI into existing software, websites, mobile apps, customer support systems, and business workflows.

31. AI Chatbot Development

/ai-chatbot-development

32. AI Agent Development

/ai-agent-development

33. Generative AI Development

/generative-ai-development

34. OpenAI Integration Services

/openai-integration

35. AI Automation Services

/ai-automation-services

36. WhatsApp AI Automation

/whatsapp-ai-automation

37. AI Voice Agent Development

/ai-voice-agent-development

38. AI Document Processing

/ai-document-processing

39. AI-Powered Business Solutions

/ai-business-solutions

CATEGORY E — ERP & BUSINESS SOLUTIONS

40. ERP Software Development

/erp-software-development

41. CRM Software Development

/crm-software-development

42. HRMS Software Development

/hrms-software-development

43. Inventory Management Software

/inventory-management-software

44. POS Software Development

/pos-software-development

45. Billing & Invoicing Software

/billing-invoicing-software

/manufacturing-erp-software

47. Garment ERP Software

/garment-erp-software

48. School Management Software

/school-management-software

49. Hospital Management Software

/hospital-management-software

50. Restaurant Management Software

/restaurant-management-software

CATEGORY F — CLOUD & DEVOPS

51. AWS Cloud Services

/aws-cloud-services

52. Cloud Migration Services

/cloud-migration-services

53. DevOps Services

/devops-services

54. CI/CD Implementation

/ci-cd-services

55. Cloud Deployment Services

/cloud-deployment

56. Server Management

/server-management

57. Cloud Backup & Disaster Recovery

/cloud-backup-disaster-recovery

CATEGORY G — DIGITAL MARKETING

58. Digital Marketing Company

/digital-marketing-company-bangalore

59. SEO Services

/seo-services-bangalore

60. Local SEO Services

/local-seo-services

61. Google Ads Management

/google-ads-management

62. Meta Ads Management

/meta-ads-management

63. Social Media Marketing

/social-media-marketing

64. Lead Generation Services

/lead-generation-services

65. WhatsApp Marketing

/whatsapp-marketing

66. Content Marketing

/content-marketing

CATEGORY H — DESIGN

67. UI/UX Design Services

/ui-ux-design-services

68. Website UI Design

/website-ui-design

69. Mobile App UI Design

/mobile-app-ui-design

70. Branding & Logo Design

/branding-logo-design

CATEGORY I — SUPPORT

71. Website Maintenance

/website-maintenance

72. Mobile App Maintenance

/mobile-app-maintenance

73. Software Maintenance

/software-maintenance

74. WordPress Maintenance

/wordpress-maintenance

75. AMC & Technical Support

/amc-technical-support

4. HOMEPAGE STRUCTURE

I recommend this exact homepage flow.

SECTION 1 — HERO

Heading

We Build Digital Solutions That Move Your Business Forward

Subheading

From high-performance websites and mobile apps to custom software, AI automation, ERP systems, cloud solutions, and digital marketing — Innometrics Technologies helps businesses build, automate, and grow.

Buttons

Start Your Project

Talk to Our Experts

Trust Numbers

150+ Websites Delivered

6+ Mobile Applications

X+ Years Experience

X+ Happy Clients

Only publish numbers you can verify.

SECTION 2 — TRUST / CLIENT LOGOS

Trusted by Businesses, Startups & Growing Brands

Display client logos.

SECTION 3 — ABOUT

Heading

Technology That Solves Real Business Problems

Content:

We don't just build software. We understand your business, identify opportunities for digital transformation, and create technology solutions that improve efficiency, customer experience, and business growth.

Button:

Discover Innometrics

SECTION 4 — CORE SERVICES

Show 8 cards:

Web Development

Modern, responsive, SEO-friendly websites and web applications.

Mobile App Development

Android, iOS and cross-platform mobile applications.

Custom Software

Business-specific software designed around your workflows.

AI & Automation

Intelligent automation, AI agents, chatbots and business solutions.

ERP & CRM

Integrated systems that simplify operations and improve visibility.

E-Commerce

Online stores and multi-vendor marketplaces.

Cloud & DevOps

Secure, scalable cloud infrastructure and deployment.

Digital Marketing

SEO, paid advertising, social media and lead generation.

Button:

Explore All Services

SECTION 5 — AI BANNER

This should be visually prominent.

Heading

Make Your Business Smarter with AI

Content

Automate repetitive work, improve customer support, qualify leads, analyze business data, and build intelligent digital experiences with practical AI solutions.

Cards:

- AI Agents
- AI Chatbots
- WhatsApp Automation
- AI Voice Assistants
- Generative AI
- Business Automation

CTA:

Explore AI Solutions

SECTION 6 — INDUSTRY SOLUTIONS

Heading

Technology Solutions Built for Your Industry

Cards:

- Healthcare
 - Education
 - Manufacturing
 - Garments
 - Travel & Tourism
 - Logistics
 - E-Commerce
 - Real Estate
 - Restaurants
 - Retail
 - Professional Services
 - Startups
-

SECTION 7 — SOLUTIONS

This is where you convert visitors into leads.

Heading

Have a Business Challenge? We Have a Digital Solution.

Cards:

Need a Business Website?

→ Website Development

Need a Mobile App?

→ Mobile App Development

Need to Automate Your Business?

→ ERP & Business Automation

Need More Customers?

→ Digital Marketing & Lead Generation

Need AI for Your Business?

→ AI & Automation

Need a Custom Software Product?

→ SaaS & Custom Software

SECTION 8 — TECHNOLOGY STACK

Display:

Frontend

React.js | Next.js | HTML | CSS | JavaScript

Backend

Node.js | Express.js | PHP | Laravel

Mobile

Flutter | Dart | React Native

Database

MySQL | MongoDB | Firebase

Cloud

AWS | Firebase | Cloudflare

CMS

WordPress | WooCommerce

Payments

Razorpay | Payment APIs

Don't list a technology unless your team actually supports it.

SECTION 9 — OUR PROCESS

01. Discover

Understand your business and requirements.

02. Plan

Define features, technology, timeline, and roadmap.

03. Design

Create UI/UX and user journeys.

04. Develop

Build the solution using modern technologies.

05. Test

Quality assurance and performance testing.

06. Launch

Deploy to production.

07. Grow

Maintenance, marketing, optimization, and continuous improvements.

SECTION 10 — CASE STUDIES

Don't only show portfolio screenshots.

Each case study should contain:

Client Problem

Our Solution

Technology

Key Features

Development Process

Result

Example:

Namma Savaari — Bus Booking Platform

A digital bus booking solution designed to simplify online bus search, booking, payment, and management.

This style is much more convincing than:

"We developed a website using Flutter."

SECTION 11 — WHY INNOMATRICS?

One Technology Partner

From idea to deployment.

Business-Focused Development

Technology aligned with business goals.

Scalable Architecture

Solutions designed for future growth.

Transparent Process

Clear communication and project visibility.

End-to-End Support

Development, deployment, maintenance, and growth.

Long-Term Partnership

We grow with your business.

SECTION 12 — TESTIMONIALS

Add genuine client testimonials.

Don't use generic fake testimonials.

SECTION 13 — FAQ

Questions such as:

- How much does a website cost?
 - How much does a mobile app cost?
 - How long does development take?
 - Do you provide source code?
 - Do you provide maintenance?
 - Do you provide hosting?
 - Can you integrate payment gateways?
 - Can you develop custom ERP software?
 - Do you provide AI solutions?
 - Do you work with international clients?
-

SECTION 14 — FINAL CTA

Heading

Have an Idea? Let's Build It Together.

Content

Tell us about your business, project, or digital challenge. Our team will help you identify the right technology, development approach, and growth strategy.

Start Your Project

Request a Consultation

5. SEO KEYWORD STRATEGY

I recommend dividing keywords into four levels.

Level 1 — High Commercial Intent

- Software Development Company Bangalore
 - Web Development Company Bangalore
 - Mobile App Development Company Bangalore
 - Custom Software Development Company
 - AI Development Company Bangalore
 - ERP Software Development Company
 - SaaS Development Company
 - Digital Marketing Company Bangalore
-

Level 2 — Service Keywords

- Flutter App Development Company
 - React Development Company
 - Node.js Development Company
 - Laravel Development Company
 - WordPress Development Company
 - E-Commerce Development Company
 - CRM Development Company
 - ERP Development Company
 - AI Chatbot Development
 - AI Automation Services
 - AWS Cloud Services
 - DevOps Services
 - SEO Services Bangalore
 - Google Ads Agency Bangalore
-

Level 3 — Long-Tail Keywords

Examples:

- Best software development company in Bangalore
- Custom ERP software development company in Bangalore
- Flutter mobile app development company in Bangalore
- AI automation company for small businesses

- Custom CRM software for businesses
 - Garment ERP software development company
 - Manufacturing ERP software development
 - Tours and travel management software
 - Multi-vendor e-commerce app development
 - Custom SaaS product development company
-

Level 4 — Industry Keywords

Examples:

- Garment ERP Software
 - Manufacturing ERP Software
 - Hospital Management Software
 - School Management Software
 - Restaurant POS Software
 - Tours and Travel Software
 - Logistics Management Software
 - Real Estate CRM Software
 - Matrimony App Development
 - Food Delivery App Development
-

6. LOCAL SEO PAGES

I recommend creating location pages only where you genuinely serve clients.

Primary

`/software-development-company-bangalore`

Additional

- `/web-development-company-bangalore`
- `/mobile-app-development-company-bangalore`
- `/ai-development-company-bangalore`
- `/digital-marketing-company-bangalore`

Potential future locations:

- Mysore
- Chennai

- Hyderabad
- Pune
- Mumbai
- Delhi
- UAE
- USA

Important: Don't create dozens of near-identical city pages just to target keywords. Current SEO trends favor useful, original pages with real expertise and evidence rather than thin template pages.

7. SEO TEMPLATE FOR EVERY SERVICE PAGE

Every service page should follow this structure:

H1

Primary keyword

Hero

One-line value proposition

Introduction

100–150 words

What We Offer

5–8 service capabilities

Features

6–12 features

Our Process

5–7 steps

Technologies

Relevant technologies

Industries

Where the service applies

Benefits

Business outcomes

Case Study

Relevant project

FAQs

5–8 questions

CTA

Request a consultation

Internal Links

Link to:

- Related services
- Relevant industries
- Portfolio
- Case studies
- Blog articles
- Contact page

8. BLOG / SEO CONTENT HUB

Create a dedicated `/blog` section.

Web Development

- How Much Does Website Development Cost in Bangalore?
- How to Choose a Web Development Company?
- WordPress vs Custom Website

- React vs WordPress
- How Much Does an E-Commerce Website Cost?

Mobile Apps

- How Much Does It Cost to Build an App?
- Flutter vs React Native
- Android vs iOS App Development
- How to Build a Food Delivery App
- How to Build a Bus Booking App

AI

- How Can AI Automate Small Businesses?
- AI Chatbot vs Traditional Chatbot
- AI Agents for Business
- How to Add AI to Existing Software
- WhatsApp AI Automation for Businesses

ERP

- What Is ERP Software?
- How Much Does Custom ERP Cost?
- ERP vs Excel
- Manufacturing ERP Guide
- Garment ERP Software Features

Digital Marketing

- SEO vs Google Ads
- How to Generate Leads Online
- Local SEO Guide
- Google Business Profile Optimization
- Digital Marketing for Small Businesses

9. HIGH-VALUE LEAD MAGNETS

Add these to your website.

Free Website Audit

Get a Free Website Performance Audit

Free SEO Audit

Check Your Website SEO Score

Free App Consultation

Discuss Your Mobile App Idea

Free AI Consultation

Discover Where AI Can Automate Your Business

Free ERP Consultation

Get a Custom ERP Solution Assessment

These can generate leads instead of relying only on a generic **Contact Us** page.

10. CONTACT / LEAD FORM

I recommend a smart form:

Step 1

What do you need?

- Website
- Mobile App
- Custom Software
- ERP / CRM
- AI / Automation
- E-Commerce
- Digital Marketing
- Other

Step 2

Business Type

- Startup

- Small Business
- SME
- Enterprise

Step 3

Budget

- Under ₹50,000
- ₹50,000–₹1 Lakh
- ₹1–5 Lakhs
- ₹5–10 Lakhs
- ₹10 Lakhs+

Step 4

Project Details

Text box

Step 5

Contact

Name

Phone

Email

Company

This will help your sales team qualify leads before the first call.

12. MY RECOMMENDED NEW WEBSITE POSITIONING

I would structure the entire brand around these **4 business pillars**:

**AI BUSINESS
AUTOMATIC**

01 — BUILD

Websites, Apps & Custom Software

02 — AUTOMATE

AI, ERP, CRM & Business Automation

03 — SCALE

Cloud, DevOps & Technology Infrastructure

04 — GROW

SEO, Digital Marketing & Lead Generation

This creates a very clear business story:

BUILD → AUTOMATE → SCALE → GROW

My Strongest Recommendation

For **Innomatrics Technologies**, I would **not launch all 70+ pages immediately**.

Phase 1 — Launch First

Homepage + About + Contact

10 Core Service Pages

1. Website Development
2. Mobile App Development
3. Custom Software
4. AI Development
5. AI Automation
6. ERP Development
7. CRM Development
8. SaaS Development
9. E-Commerce Development
10. Digital Marketing

5 Industry Pages

1. Manufacturing
2. Garment
3. Travel & Tourism
4. Healthcare
5. E-Commerce

5 High-Value Location/SEO Pages

1. Software Development Company Bangalore
2. Web Development Company Bangalore
3. Mobile App Development Bangalore
4. AI Development Bangalore
5. Digital Marketing Bangalore

Then build the remaining **50+ pages over 3–6 months**, supported by original case studies and useful blog content.

This approach is better than immediately publishing 70 pages of generic text. Current competitors in Bangalore are increasingly combining **software development, AI, automation, ERP/CRM, cloud, and digital growth**, so your opportunity is to differentiate Innometrics around a complete **"Build + Automate + Scale + Grow"** model while using your actual project experience as proof.

Recommended new homepage headline:

Build. Automate. Scale. Grow.

Your Technology Partner for Software, AI & Digital Growth.

Recommended CTA:

Let's Build Your Digital Future

Recommended primary SEO title:

Innomatrics Technologies | Software, AI & Digital Solutions Company in Bangalore

Recommended meta description:

Innomatrics Technologies provides web and mobile app development, custom software, ERP, CRM, AI automation, SaaS, cloud, and digital marketing solutions for businesses in Bangalore and across India.

If you implement this structure, your website will move from a **basic IT services website** toward a **lead-generation platform and technology company website**, with separate SEO entry points for each service and industry.

give ui

Yes. I recommend a **premium, modern, technology-focused UI** for the new **Innomatrics Technologies** website.

Recommended Design Direction

Style: Premium SaaS + AI Technology + Enterprise

Theme: Dark navy / white with electric blue accents

Feel: Professional, modern, trustworthy, high-conversion

Target: Startups + SMEs + Enterprises

Primary CTA: Start Your Project

Secondary CTA: Book a Free Consultation

Homepage UI Flow

 AI Powered SaaS Platform

Build, Scale & Automate Your Modern SaaS Business

Boost productivity, streamline workflows, and unlock powerful AI-driven automation tools built for fast-growing startups and modern teams.

VISUAL DESIGN SYSTEM

Primary Colors

- Deep Navy: #07111F
- Blue: #2563EB
- Electric Blue: #38BDF8
- White: #FFFFFF
- Light Background: #F8FAFC

Typography

Heading: Inter / Manrope

Body: Inter

UI Style

- 16–24px border radius
- Soft shadows
- Glassmorphism used selectively

- Gradient backgrounds
- Smooth hover animations
- Scroll reveal animations
- Animated counters
- Interactive service cards
- Magnetic CTA buttons
- Subtle 3D technology graphics

MOBILE UI

The mobile version should have:

≡ **INNOMATRICS** Let's Talk

Hero:

Build. Automate. Scale. Grow.

Buttons stacked vertically.

Services → 1-column cards.

Industry Solutions → horizontal swipe.

Case Studies → vertical cards.

Floating bottom CTA:

 WhatsApp |  Call

My recommendation for the final design

I would create the website in a **premium dark/light hybrid style**:

Hero: Dark premium AI technology

About: White

Services: Light grey

AI: Dark futuristic

Industries: White

Solutions: Light

Case Studies: Dark

Process: White

Testimonials: Light grey

Final CTA: Blue gradient

Footer: Dark navy

This will make **Innomatrics Technologies** look more like a **modern product engineering and digital transformation company**, rather than a typical small IT service agency.
